Profile Summary

Senior Software Development Engineer with 5+ years of experience designing, developing and maintaining web platforms in fast-peaced environments. Experienced in the processing of big data on distributed systems with multithreading. Excited to transform real life problems into rewarding solutions on Amazon's advertising platforms.

Technical Skills

- **Programming Languages:** java, python, C++, typescript, nodejs, spring boot, react.
- **Cloud AWS:** EC2, S3, Aurora, Elasticsearch, SNS, SMS, CloudWatch, Code Deploy, Lambda.
- **Big Data:** spark, hadoop, zeppelin, multithread, star, snowflake, SQL, NoSQL.
- **Engineering:** object oriented design, micro services, clean code, design patterns, SecDevOps.

Work Experience

Senior Software Developer | AI Financial - Markham, Ontario. **01/2026 - Present**

- Integrated AWS messaging services to deliver promotional email campaigns and Amazon SNS SMS-based six-digit authentication codes, standardizing brand formatting and improving communication consistency.
- Automated CI/CD pipelines using GitHub Actions and AWS CodeDeploy to deploy applications to Amazon EC2, improving deployment consistency, reducing manual effort, and supporting high availability.
- Enhanced and maintained cloud-based and on-premises investment systems using React, Python, and Java Spring Boot, supporting a micro services architecture and improving RESTful API integration and request handling.

System Technician Programmer | Credimatic Minsait - Guayaquil, Ecuador. **09/2023 - 02/2024**

- Engineered highly available Java services against a PostgreSQL S3 database for a payment platform, handling sensitive financial data under PCI-DSS controls with zero data loss at scale.
- Monitored, troubleshot and optimized mission-critical services in production, driving systematic root-cause analysis that raised uptime to 99.7% and cut recurring incidents by 30%.
- Translated business and regulatory requirements into well-scoped software features with cross-functional stakeholders, delivering three releases on schedule without rollbacks.

Mobile Application Developer | Schlumberger - Guayaquil, Ecuador. **02/2023 - 07/2023**

- Developed Android application features and on-device components in Java and Kotlin, implementing secure local storage and permission handling for customer data on devices.
- Architected Spring Boot microservices with OAuth 2.0 and role-based access control, enforcing least-privilege policies that eliminated unauthorized access across all tiers.
- Applied full-lifecycle practices including coding standards, code reviews, source control, build processes and testing, documenting designs that cut onboarding time by 20%.

Education

- **Cybersecurity and Threat Management | Seneca Polytechnic - Toronto, Ontario.** **05/2025 - 04/2026**
- **Database Application Developer | Seneca Polytechnic - Toronto, Ontario.** **09/2024 - 04/2025**
- **Bachelor of Computer Science | ESPOL - Guayaquil, Ecuador.** **09/2018 - 10/2023**

Projects

- Created a privacy-aware data pipeline on AWS IoT Core and Lambda, encrypting device telemetry in transit and at rest and surfacing anomalies on Kibana dashboards in real time.
- Developed a computer vision pipeline in Python for drone-captured imagery, pairing YOLOv8 at 91.3% accuracy with a convolutional transformer at 85.92%, peer-reviewed via ESPOL.

Certificates

- **2026:** CompTIA Security+, Microsoft SC-900, OPSWAT Infrastructure Protection.
- **2025:** AWS Cloud Security, CISCO Cybersecurity, Seneca Security Awareness, Linux Scripting.
