Profile Summary

Results-driven Software Developer with 5+ years of experience developing scalable web and mobile applications. Skilled in full-stack development, deployment on AWS and Azure, network and data analytics, and security standards. Passionate about solving complex challenges, driving innovation, and delivering high-impact solutions.

Technical Skills

- **Languages & Frameworks:** Python, Java, TypeScript, C++, Django, Spring Boot, React, NodeJS.
- **Databases & Analytics:** SQL, NoSQL, Spark, Hadoop, Zeppelin, Power BI, R Studio.
- **Cloud & DevOps:** AWS, Azure, Service Configuration, GitHub, CI/CD automation, Version Management.
- **Security Standards:** Zero Trust, Network Security, Risk Management, IAM, RBAC, SIEM.

Work Experience

Senior Software Developer | Ai Financial - Markham, Ontario. **01/2026 - 10/2026**

- Led the architecture of a secure investment data platform using Java, Spring Boot, React, and REST APIs, improving data discovery and reducing portfolio processing time by 65%.
- Introduced event-driven microservices, automated testing, CI/CD, and observability to address scalability risks, increasing deployment reliability and reducing production incidents by 53%.
- Built Docker-based CI/CD pipelines with automated integration tests and production monitoring, shortening release cycles by 33% and improving service resilience.

System Technician Programmer | Credimatic Minsait - Guayaquil, Ecuador. **09/2023 - 02/2024**

- Migrated financial processing services with Java, Spring Boot, and Oracle SQL, automating validation workflows and reducing manual reconciliation effort by 40%.
- Implemented role-based access controls, audit logging, data-quality checks, and lineage tracking to meet governance requirements and improve traceability across regulated datasets.
- Directed design reviews and mentored engineers on domain-driven design, API security, and performance optimization, accelerating delivery by 25% while strengthening engineering standards.

Mobile Application Developer | Schlumberger - Guayaquil, Ecuador. **02/2023 - 07/2023**

- Developed responsive mobile and web experiences with TypeScript, React, and reusable components, enabling field teams to securely capture operational data and improving completion rates by 25%.
- Integrated mobile applications with versioned REST APIs and event-driven services, adding resilient synchronization that maintained reliable operations in low-connectivity environments.
- Partnered with product, security, and field stakeholders to translate operational requirements into scalable solutions, improving application performance and reducing user-reported issues by 20%.

Education

- **Cybersecurity and Threat Management | Seneca Polytechnic - Toronto, Ontario.** **05/2025 - 04/2026**
- **Database Application Developer | Seneca Polytechnic - Toronto, Ontario.** **09/2024 - 04/2025**
- **Bachelor of Computer Science | ESPOL - Guayaquil, Ecuador.** **09/2018 - 10/2023**

Certificates

- **2026:** CompTIA Security+, Microsoft SC-900, OPSWAT Infrastructure Protection.
- **2025:** AWS Cloud Security, CISCO Cybersecurity, Seneca Security Awareness, Linux Scripting.

Projects

- Developed a machine-learning pipeline to analyze credit card transaction data and classify potentially fraudulent transactions, applying SMOTE to address imbalance and achieve 84.27% accuracy, 84.71% precision.
- Designed a proactive monitoring pipeline that streamed IoT telemetry through AWS IoT Core into Elasticsearch and Kibana, enabling anomaly visualization and earlier detection of potential service issues.
